

Villa a Sesta

A village of ancient origins and a thousand suggestions

In the heart of the Chianti countryside, in a landscape where art, history and nature coexist, you come across a country of ancient origins and a thousand suggestions. **Villa a Sesta** is the typical and **picturesque Chianti village** in the municipality of Castelnuovo Berardenga located along the provincial road that leads to Brolio.

The **Church of Santa Maria** a Villa a Sesta has been remembered since the 8th century as a suffragan of the Pieve di San Felice. The current building, however, is the result of a complete rebuilding and subsequent transformations dating back to the 19th century. On the side altars, contained within the relevant chapels, there are the wooden statue of the Madonna col Bambino, attributed to **Jacopo della Quercia**, and the painting of Santa Caterina, of the 18th century.

Walking along the streets of the village it is easy to get to the final part of the village Villa a Sesta which allows you to enjoy a **360° panoramic view of Chianti and Siena**. That's where we are!
